Work Experience

Freelance Content Creator & Translator

Self-Employed

August, 2026 - Present

Copywriting | Language Translation | Logo Design | Social Media | Solar Energy

Independent remote freelancer providing professional copywriting, graphic design, and brand localization services.

Key achievements and capabilities:
• Designed high-engagement social media visual layouts and marketing copies using Canva.
• Executed precise English-to-Amharic landing page localization and document translation.
• Maintained reliable, fast-turnaround remote delivery schedules for all project assets.

Freelance Content Creator & Translator

Localization | Copywriting | Logo Design | Social Media | Solar Energy

Portfolio

Bunna Bites & Brew

Copywriting | Language Translation | Logo Design | Social Media | Solar Energy

Social media brand content: Canva design with deep coffee brown, ochre, and off-white palette. Persuasive copy for Ethiopian coffee lovers.

SolarFlow Energy

Copywriting | Language Translation | Logo Design | Social Media | Solar Energy

E-Commerce website localization (English 'Amharic). Hero, features, and CTA adapted for East African market with technical precision.

Education

Haramaya

Computer science - Bachelor's Degree

February, 2026 - June, 2029

Currently pursuing my Bachelor's degree in Computer Science. My technical background provides me with a strong, deep understanding of software, design logic, and technical terminology. I leverage these skills to build functional web layouts, write clear documentation, and execute highly accurate technology-focused translations and localizations (English to Amharic).

Certification

Python Programming Essentials

Haramaya University (College of Computing & Informatics)

May, 2026

Completed hands-on core Python training organized by the Department of Computer Science at Haramaya University, validating software logic and programming fundamentals

Global Chapters - Ethiopia - Android Fundamentals

Udacity

March, 2026

Successfully completed intensive training in mobile application architecture and core development principles through the global Udacity program in Ethiopia.

C++ for Beginners

Founder & CEO Mr. Bishal KhadkaIssued at*: Leave blank or approximate.

March, 2026

Foundational software training covering structural programming principles, object-oriented concepts, and C++ application logic.

Language

English
